Letter of Recommendation for Jonah Watson

To Whom It May Concern,

It is my pleasure to offer my strongest recommendation for Jonah Watson. I have had the opportunity to observe Jonah's academic performance, professional growth, and personal character, and I can state without hesitation that he represents the very best of Adrian College's emerging talent.

Jonah is graduating this May as a senior with an exceptional academic record, maintaining a 3.96 GPA while simultaneously completing a Bachelor of Arts in Data Analytics, a Bachelor of Business Administration in Management, and an Applied Computing Certificate. This combination of disciplines reflects both intellectual rigor and strategic foresight. He has consistently demonstrated the ability to integrate analytical thinking with sound business judgment, an increasingly rare and valuable skill set in today's data-driven environment.

Beyond the classroom, Jonah's selection into the Trustee Mentorship Program speaks to the confidence that faculty and leadership have in his character, professionalism, and long-term potential. His participation in this program has allowed him to engage meaningfully with institutional leadership and further refine his perspective on organizational strategy, leadership, and service.

Jonah also balances his academic commitments with professional responsibilities, working both within the Student Life at Adrian College and at Danley's. Through these roles, he has demonstrated reliability, initiative, and strong interpersonal skills. He has shown an ability to manage competing priorities while maintaining a high standard of excellence, an indicator of strong time management and personal discipline.

Academically and professionally, Jonah's work in data analytics is particularly impressive. He has completed two substantial research projects focused on public health: Investigating and Predicting Alcohol Misuse Risk Among American College Students and Sleep Health in College Students: A Multivariable Predictive Modeling Analysis. These projects required him to work with large, real-world datasets and demonstrate proficiency in data cleaning, analysis, visualization, predictive modeling, and reporting. The sophistication of his work reflects not only technical competence but also intellectual curiosity and a commitment to applying analytics in ways that can positively impact public health and student well-being.

Jonah is a disciplined, thoughtful, and highly capable young professional. He combines analytical precision with maturity, integrity, and a collaborative spirit. I am confident that he will bring value, insight, and leadership potential to any organization or academic program fortunate enough to have him. I recommend Jonah Watson without reservation and with great enthusiasm. Should you require any additional information, I would be pleased to provide it.

Sincerely,

Patrick Farver
Executive Director
